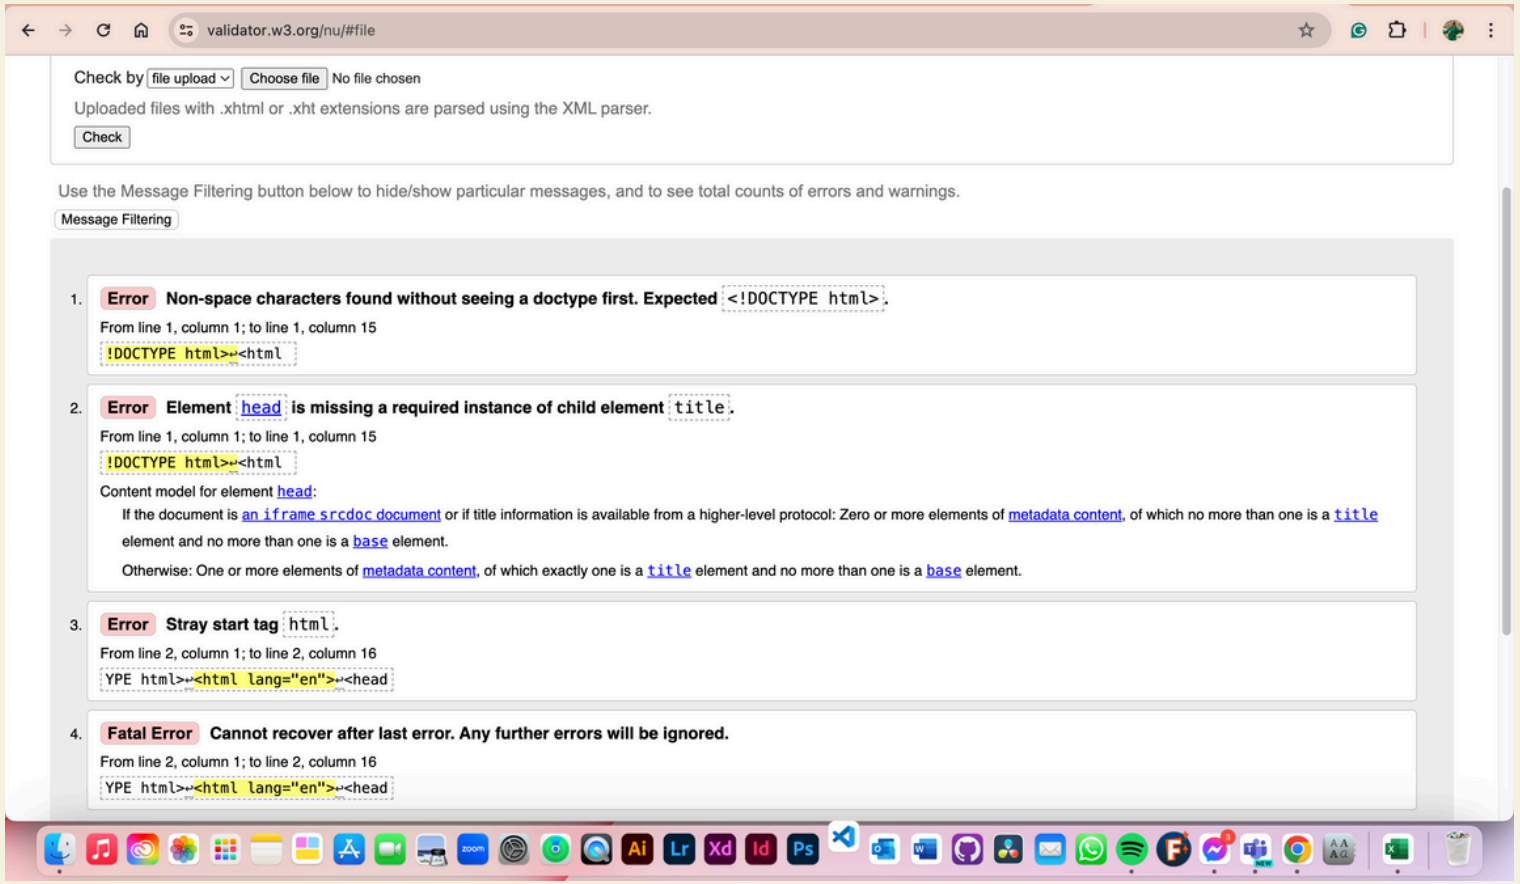
LIST OF PROCESSES ON THE WEBSITE

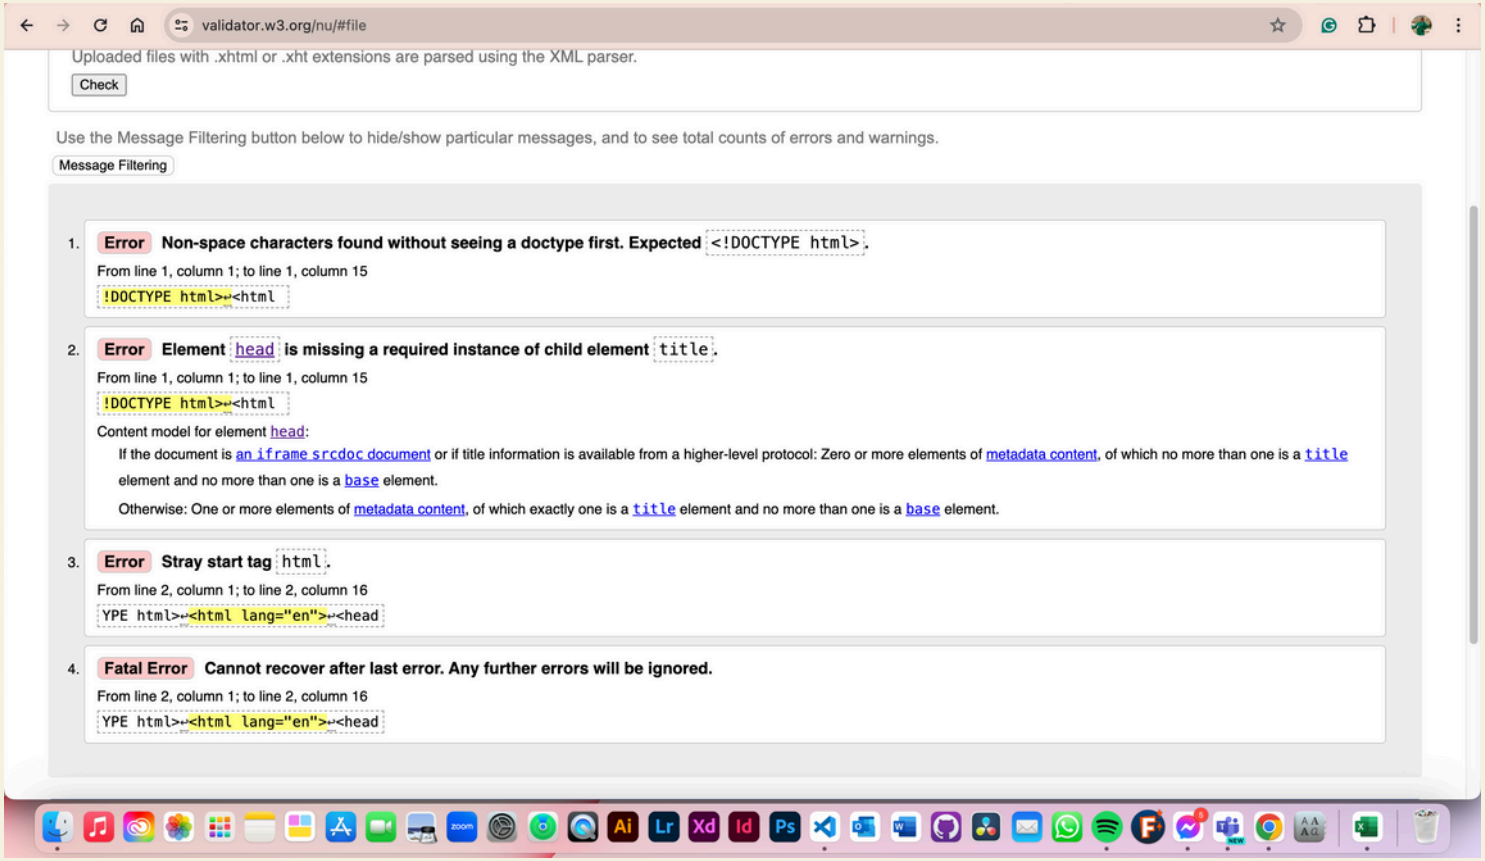
PROCESS	EXPECTED OUTPUT	RESULT	COMMENTS
Home page Scrollable	Be able to scroll and view artworks in the home page	Pass	
Understand the information showing in the home page	When viewer enters the website he will understand the information	Pass	
About page png image	the viewer finds information about myself	Pass	I would of liked the about page to be more visually pleasing
Crucifixions page different from gallery page	so the viewer would notice that he is in another page	Pass	I would of liked the about page to be more visually pleasing
Clickable artworks on gallery page	Gallery Page > artwork page	FAIL	If i had more time i would of added the artwork page but i wanted the website to atleasth look visually pleasing., so i spent more time doing that.

VALIDATING WEBSITE
ABOUT PAGE



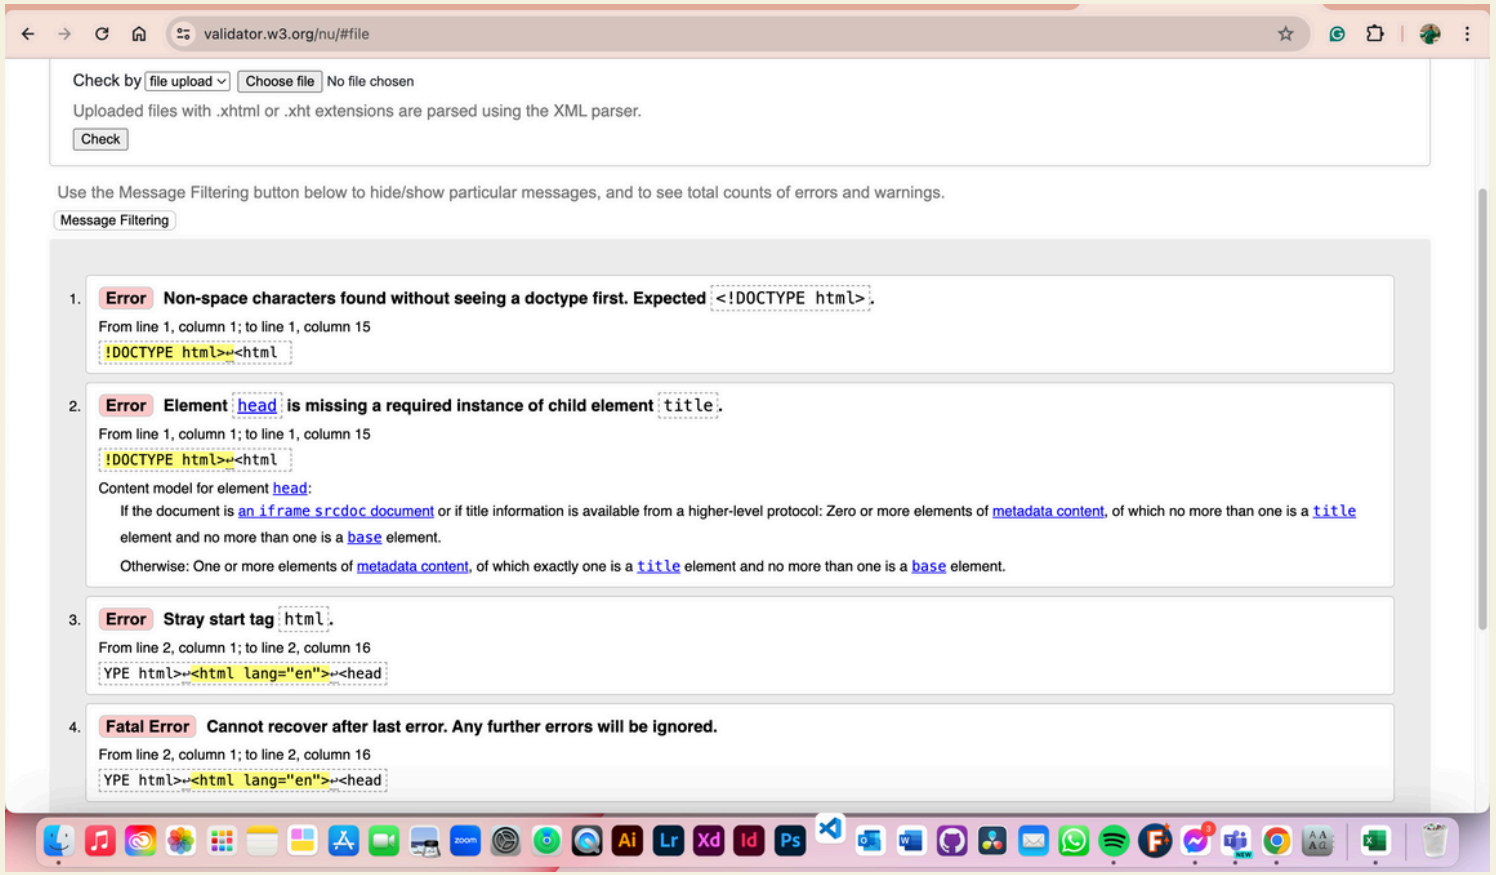
I had errors in the no-space characters so I had to find them and arrange the spacing character

VALIDATING WEBSITE
CRUCIFICTIONS PAGE



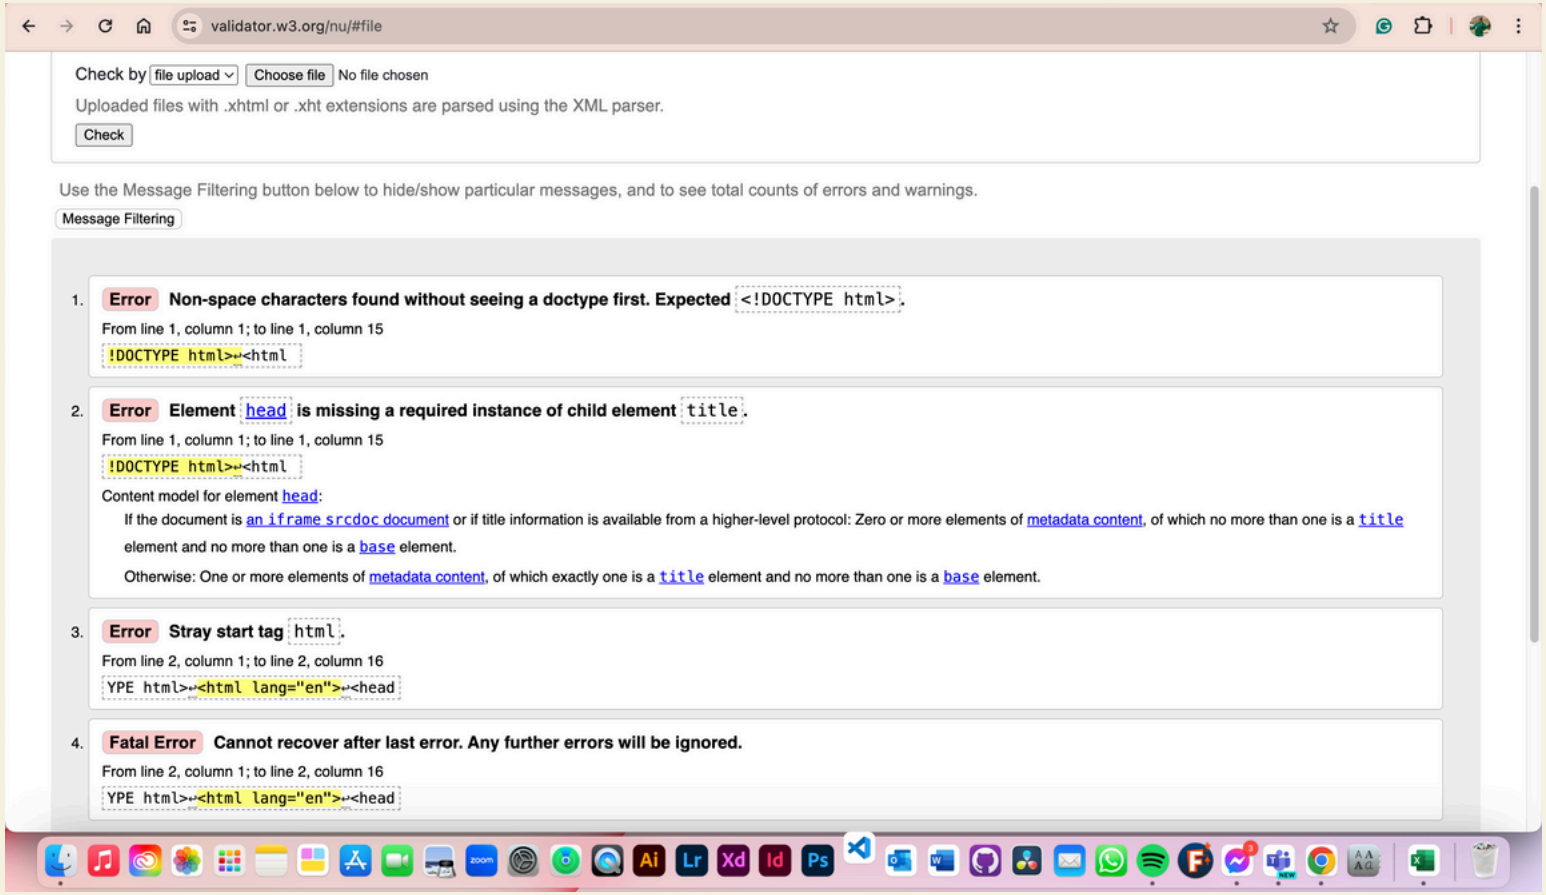
The same, I had errors in the no-space characters so I had to find them and arrange the spacing character, I also had an error In the element, the tag and a fatal error. The good thing is that the website still works fine when running it.

VALIDATING WEBSITE
GALLERY PAGE



I had errors in the no-space characters so I had to find them and arrange the spacing character, I also had an error In the element, the tag and a fatal error.

VALIDATING WEBSITE
INDEX PAGE



I noticed that all the pages had the same type of error so I had to arrange them one by one and do the same thing.
